# Supporting the Development of Outdoor Play

### **Play Crates and Trays**

Thank you for purchasing our building and construction play crates and trays which we hope your children enjoy using.

### **Play Guidance**

These crates and trays offer children open ended opportunities to build and construct on a large scale outdoors. They will encourage co-operation and will inspire children's imagination and creativity as they move, place and stack them together to represent their ideas.

### **Safety Guidance**

It is essential that children's play is effectively supported and managed at all times by carrying out suitable and sufficient risk assessments which identify and take into account children's needs and environmental conditions. Wear and tear of these resources should be regularly monitored and defective or damaged items removed.
